

computer readable program code for determining total maximum reserved runtime resources for application components stored in the flash memory of said portable device; and

computer readable program code for calculating said CARSRMAX based on said total runtime system resources and said total maximum reserved runtime resources.

*The product of claim 21,*

22. wherein said computer readable program code embodied in a computer readable medium further comprises:

computer readable program code for removing one or more of said application components stored in the flash memory of said portable device; and

computer readable program code for releasing maximum runtime resources reserved for said one or more application components removed from the flash memory of said portable device, thereby increasing said CARSRMAX of said portable device.

23. (Cancelled)

24. The product of claim 20, wherein said computer readable program code embodied in a computer readable medium further comprises:

computer readable program code for running one or more of said application components stored in flash memory of the portable device using no
